	Who We Are	4 - 5
	Sustainability & Laboratory	6 - 7
NBR70 O-Rings General purpose nitrile rubber. 70 Durometer. Excellent oil and fuel resistance.		8 - 19
NBR90 O-Rings High-hardness nitrile rubber. 90 Durometer. Superior extrusion resistance for high pressure.		20 - 29
FKM75 (Viton) O-Rings 75 Durometer. Outstanding chemical and high-temperature resistance.		30 - 42
Rubber Strips Continuous o-ring cord for custom sizing. Available in NBR, EPDM, FKM.		43
Silicone O-Rings Food-grade compliant options. Excellent flexibility. Best for extreme high and low temperature.		44-48
O-Rings Sets Assortment kits for maintenance & repair. Multiple standard size and materials.		49

WHO WE ARE

ADAMAR RUBBER operates under ADAMAR GROUP, which was established in 2003. Alongside a corporate culture built over decades, we demonstrate a firm commitment to ethical commercial principles and maintain a strictly customer-centric approach.

ADAMAR RUBBER provides professional industrial rubber solutions, specializing in both extrusion manufacturing and high-precision compression molding. Our facility is equipped with rubber compounding machines, advanced extrusion lines, and hydraulic presses. This infrastructure allows us to produce an extensive range of rubber profiles and technical moulded parts to the highest standards. We work closely with our customers from design to serial production, delivering reliable rubber components for demanding industrial environments.

Technical Oversight

Our In-house Laboratory
Every stage of our production is monitored under the principle of "measurable quality" within our specialized laboratory.

Precision Density Measurements

We maintain constant control over the compliance and chemical stability of our rubber compounds using modern equipment.

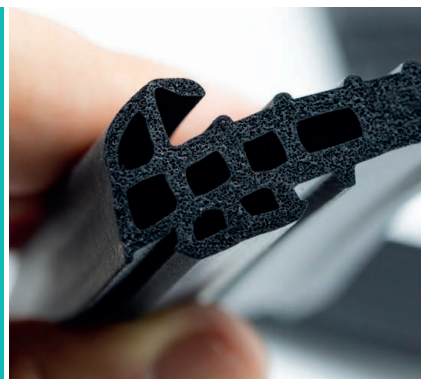

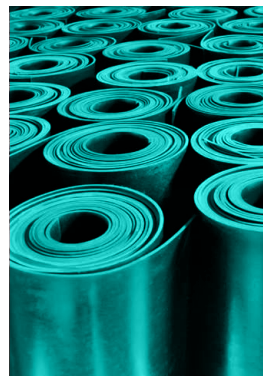

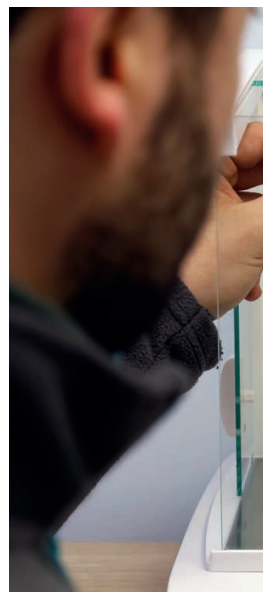

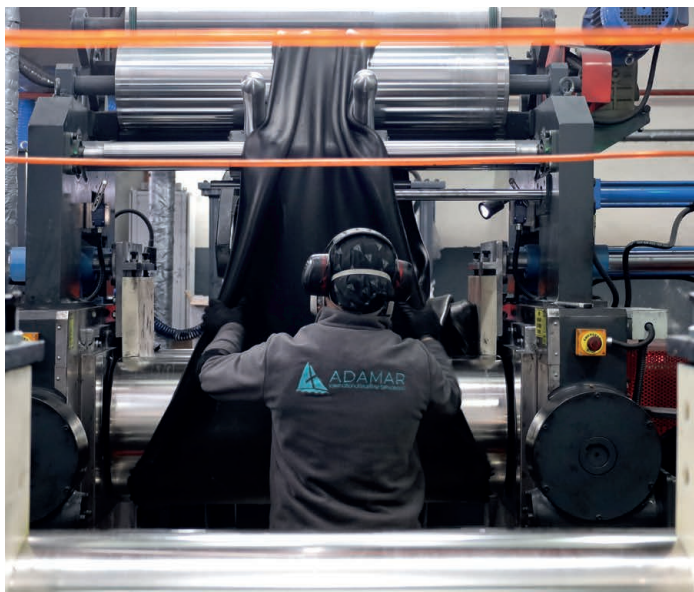

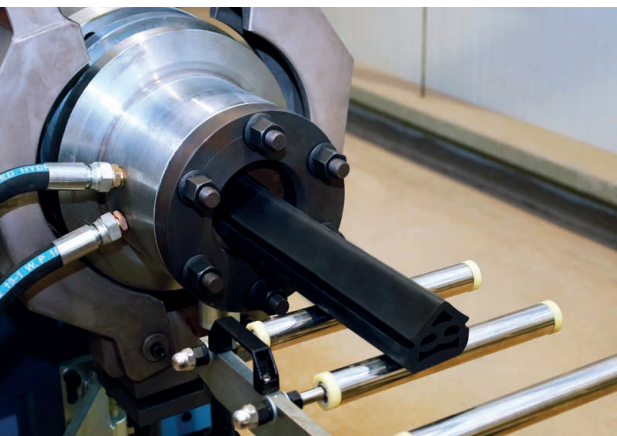

Tensile & Elongation Testing

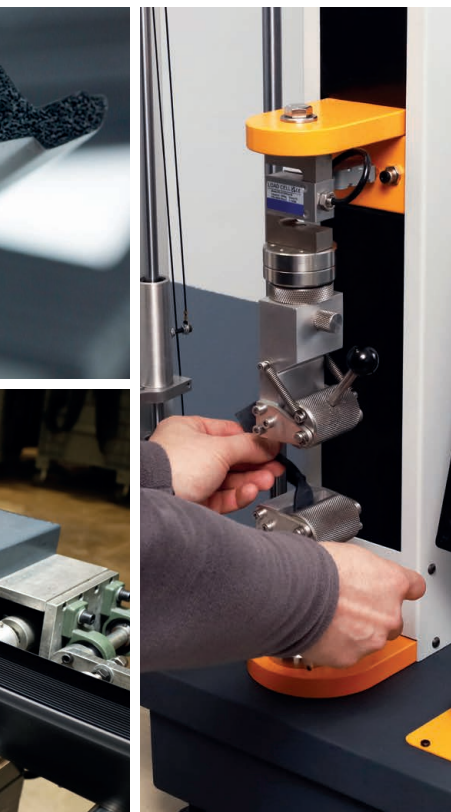

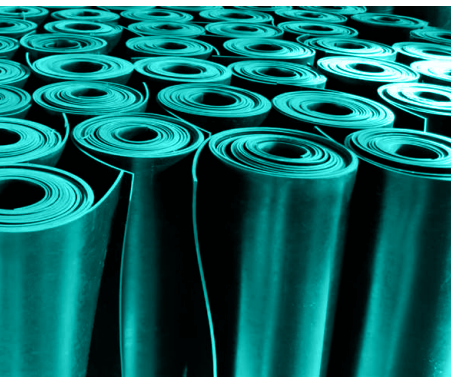

We analyze the strength and elongation values of our products to ensure maximum durability in the field.

Physical Quality Verification

Every step, from raw material to the final product, is meticulously tracked to ensure full compliance with technical specifications.

We utilize our testing infrastructure to guarantee the mechanical and physical performance of our products.

QUALITY, SUSTAINABILITY, AND OUR LABORATORY

Adamar Rubber prioritizes quality and sustainability at every stage of production. Our facility, equipped with energy-efficient machinery that respects both people and the environment, is designed to minimize our environmental impact. We carefully select suppliers who adhere to ethical production standards, sustainability principles, and high-quality standards. All raw materials we use are certified, traceable, and carefully sourced, ensuring that our products offer reliable performance and long-term durability.

At Adamar Rubber, we have established an advanced in-house laboratory to ensure that our products meet rigorous quality standards. All of our products undergo strict testing to provide long-lasting durability and reliable performance. In our laboratory, we conduct tensile strength, chemical analysis, aging, and UV resistance tests, among other critical evaluations. These thorough testing procedures ensure that our products withstand the challenging conditions of the maritime industry and can be used with confidence.

Our laboratory is equipped with globally recognized testing equipment, allowing us to maintain sustainable quality standards. This diligent quality control process enables us to consistently deliver rubber solutions with the same quality and specifications, fulfilling our commitment to provide reliable, long-lasting products for our customers.
